16.	Profit after corporate income tax	22,918,019,851	32,042,211,314	(9,124,191,463)	(28%)

Explanation:

The Parent Company's profit after corporate income tax for the first six months of 2026 decreased by 28% compared to the same period of the previous year, mainly due to the following factors:

- Competition in the industry became increasingly intense, resulting in a 9% decrease in net revenue from sales of goods and rendering of services. In addition, finance expenses increased significantly by 113%, selling expenses increased by 6%, and general and administrative expenses increased by 3%, leading to a 19% decrease in net profit from operating activities.
- Other income decreased by 53%, mainly due to a decrease in gains from the disposal of fixed assets compared to the same period of the previous year.
